

VINCENT GAGELMANS

Multidisciplinary designer and 3D Visualiser

PROFESSIONAL EXPERIENCE

3D Visualization & Spatial Design

Studio Vormzicht (self-employed – 2024–present)

Tailored visualizations for designers, architects and spatial planning studios. Focus on atmosphere, material experience and spatial legibility. Covers exteriors, interiors and public space.

HUS Interieur (2019–2023)

Full development of custom interiors: from design and visualization to technical drawings and client support. Additionally responsible for sales, marketing and supplier coordination.

SDTechnics (2012–2015)

Landscape architect with a focus on play landscapes and infrastructure projects. Analysis, design, 3D visualizations, quotes and technical plans.

Ekotuinen (2018)

Hands-on garden and green space maintenance and construction. Supporting role in design, plan production and project communication.

Baken / Archi-Verde (2011–2018)

Support in garden and landscape design. Drafting presentation, planting and working plans. Graphic design for printed materials and project communication.

Graphic Design & Communication

Prophets / Roland Central Europe (2002–2010)

Design of visual identities, print work, websites, UI design and promotional campaigns. Front-end development and digital applications.

Baken / Archi-Verde / SDTechnics (2011–2018)

Design for presentations, websites, print media and project-related communication.

Interactive & digital media

Roland / Prophets / zelfstandig (2002–2025)

Front-end development, WordPress, Mailchimp and digital applications.

Commercial & advisory work

Kast-ID / HUS (2019–2023)

Interior consulting, sales, marketing and supplier coordination.

Boomkwekerij De Bruyn (2019)

Advice to professional clients on planting and maintenance.

PROFILE

I am a multidisciplinary designer and 3D visualizer with a background in graphic design, landscape architecture, interior design and digital media. This combination allows me to approach projects visually with a strong sense of atmosphere, clarity and spatial coherence.

Whether it's architectural visualizations, design drawings, infographics or communication design. I always think in terms of the user, the place and the story.
